DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration (amendment filed on 9/15/2006) of the finality of the rejection of the last Office action (6/15/2006) is persuasive and, therefore, the finality of that action is withdrawn.

Rejection Withdrawn

2. Claims 5-6, 11-12, 18, 22-23, 28 and 31-32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-30 of U.S. Patent No. 6670345 made in the last Office Action has been withdrawn in view of the amendment filed on 9/15/2006.

Response to Arguments

3. Applicant's arguments with respect to claims 33-48 have been considered but are moot in view of the new ground(s) of rejection.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir.

Art Unit: 1772

1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 33-48 are rejected under the judicially created doctrine of obviousness-type

double patenting as being unpatentable over claims 1-30 of U.S. Patent No. 6670345.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant application and the Patent'345 are directed a label having a member with length greater than the periphery of the object, printed indicia thereon, and an adhesive.

6. Claims 33-48 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-51 of copending Application No. 10/634443. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant application and the application'443 are directed a label having a member with length greater than the periphery of the object, printed indicia thereon, and an adhesive.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
